Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 May 2005.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5, 7, 8, 10, 12-15, and 17-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Yang et al (6,005,620) for the same reasons as set forth in Section 2 of the previous office action, dated 6/10/04.

With respect to the newly added claim 21, Yang et al already discloses the concept of a control signal 42 for initiating encoding 52 of the second video stream 32.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang et al for the same reasons as set forth in Section 4 of the previous office action, dated 8/14/03.

Response to Arguments

5. Applicant's arguments filed 5/31/05 have been fully considered but they are not persuasive. Applicant asserts on pages 7 and 8 of the Remarks that Yang et al fails to disclose any profile. However, it is submitted that a profile is merely some sort of analysis. As applicant agrees, the mathematical formula of Yang et al analyzes the compression scheme in order to choose a profile. Thus, the analysis process of Yang et al meets the definition of a profile in its broadest reasonable sense.

Applicant also asserts on pages 9 and 10 of the Remarks that Yang et al fails to disclose the pausing step. However, element 34 of Yang et al illustrates a multiplexer. Although Yang et al never used the word "pause", one of ordinary skill in the art would have had no difficulty in understanding that the function of multiplexing requires the selection of one output 38 among a plurality of inputs (36, 52). Therefore, while the second input stream 52 is being multiplexed, the first input stream 36 is inherently paused (i.e. not selected in this duration).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2613

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
